

Jackite

*The Majestic
Jackite Eagle*

- 1) Peel Liner off two-faced taped inside body and head
- 2) Press body together lining up edges of body and head
- 3) With white snaps, attach feet to inside of eagle body.
Double claw goes toward eagle head
- 4) Attach swivel to beak for windsock flying or to body for
kite flying

(If flying like a windsock consider buying Jackite's Line
Rig – 7 feet of line with swivels at each end for the best
flight)

- 5) Attach line to swivel
- 6) Remember to roll up the leading edges of the wing as
explained on other instruction sheet
